Welcome from the ESPO 2025 Programme Committee

With the help of an outstanding international faculty, we will once again put together a diverse, carefully coordinated scientific programme that will cover all aspects of paediatric ORL. In addition to the latest developments in airway surgery, hearing implants and endoscopic procedures, the increasingly important influence of digitalisation and artificial intelligence will be addressed. A special focus will be on imparting knowledge and practical skills, both through numerous courses and keynote lectures as well as an extensive simulation programme.

We are looking forward to meeting you in 2025!

*Christian Sittel, Stephan Hackenberg and Thomas Deitmer
on behalf of the ESPO2025 Programme Committee*

ABSTRACT SUBMISSION NOW OPEN

Submission deadline is 31st December 2024!
